Department of Physics and Chemistry E. Segrè
University of Palermo
Viale delle Scienze, Ed. 18
90128 Palermo, Italy

Dear Prof. B. Spagnolo,

I am pleased to invite you as a visiting professor to give an intensive course on “Physics of Complex Systems” at the Institute of Fundamental and Frontier Science of the University of Electronic Science and Technology of China (UESTC) in Chengdu from April 3 to April 30, 2024. Your prominent expertise and distinguished contributions to the theory of noise-induced phenomena and nonlinear relaxation in classical and quantum metastable systems will be of great interest for our students and research group members.

One of the main purposes of your visit is to pursue scientific collaborations and set up future international cooperation between UESTC and Palermo University. Moreover, we kindly request that you deliver a seminar on the subject of your recent work at our department.

It is worth emphasizing that all your trip expenses, including air tickets and accommodation in Chengdu, will be covered by the UESTC.

Yours sincerely,
Prof Abolfazl Bayat
