The Apple Foundation Program at UNIPA

Abstract

The Apple Foundation Program is a short-term, challenge-based class designed to provide the opportunity for aspiring world-class developers to experience Apple's learning framework in order to design iOS app prototypes. It is an international academic program offered free of charge to eligible students. Starting in June 2024, on behalf of Apple Inc. the University of Palermo has launched its program. This event is to present the UNIPA foundation to all interested parties, highlighting its particularity in terms of didactic methodologies and technical content. Regarding the latter, talks about machine learning and Gaming inside the Apple ecosystem will be presented.

Speakers

Daryl Hawes (WorldWide Developer Relations Project Manager for European Apple Foundation and Academy Programs)
