## SUMMARY

Born in Palermo, Italy in 1988. He studied at the University of Palermo achieving a **BSc** in Medical Biotechnologies in 2011 acquiring a vast knowledge in Molecular Biology and Genetic Engineering. Thereafter in 2013 he obtained a **MSc** in Medical Biotechnology and Molecular Medicine performing in depth studies on Cell Culture, Exosomes from conditional media and body fluids (plasma, serum) and Proteomics. His previous dissertations One on expression and purification of a fusion protein GST-Strim and the other on Proteomic profiling of MDX mice quadriceps after aerobic exercise, and his personal inclination gave him a strong background regarding the research activity. In 2014 his project, regarding the role of exosomes released by chronic myelogenous leukemia cells in the cross-talk with the tumor microenvironment, has led him to win an International **PhD student** position for Experimental Oncology and Surgery. Moreover, he win a PON grant. In the same year he achieved the Senior Biologist License and the License for animal experimentation *in vivo*. He performed one year research period abroad (Antwerp, Belgium) working on exosomes from patient's plasma/serum, already resulted in several publications as Papers, Posters, Abstracts and Book Chapters. His deep fascination for biotechnologies and human biology led him to a regular improvement of his knowledges and qualification through seminars, workshops and congresses. He would be really interested in a position within the field of cancer research.
