BLENDED INTENSIVE PROGRAM

**SUMMER SCHOOL 2025
MODERN MARKETING & IT**

Course format

You can find detailed information about the course here Faculty of Management
[Summer Course](#)

Course format: Blended intensive program (30.6. – 4. 7. 2025 in Bratislava, 7.7. –
11. 7. 2025 online)

Students need to participate in both online and physical part

The extent of the course is 5 ECTS which will be recognized by the sending
institution based on students learning agreement

The course is open and free of charge for all students. Erasmus+ network students
will get a grant for the physical stay, applications for blended mobility funding are
submitted via the home institution's International Office. Students from other
countries need to cover their travel, visa, accommodation, and other related costs

SUMMER SCHOOL 2025 MODERN MARKETING & IT

Syllabus

This course provides an in-depth exploration of how modern marketing strategies integrate with emerging IT trends. Students will gain knowledge about digital marketing, AI, data analytics, cybersecurity, and agile marketing methodologies. The course emphasizes practical applications through case studies, project work, and hands-on exercises. Upon completing this course, students will develop a comprehensive understanding of both traditional and digital marketing strategies. They will gain proficiency in applying emerging IT tools such as AI, Blockchain, and VR/AR to enhance marketing efforts. Additionally, students will be equipped to conduct data-driven marketing research and consumer analysis, enabling informed decision-making. They will also learn to implement Agile and SCRUM methodologies in marketing project management, ensuring efficiency and adaptability. Furthermore, students will be able to analyse customer behaviour and digital transformation trends while identifying and mitigating cybersecurity risks in digital marketing.

• **Introduction to Modern Marketing & IT**

- The evolution of marketing: From Production Concept to Holistic Marketing
- The 4Ps vs. Digital 4Ps: Personalization, Platforms, Process, and Performance
- Digitalization in marketing: Opportunities and challenges
- Key IT trends transforming marketing

• **Data-Driven Marketing and Consumer Insights**

- Importance of marketing research: Data sources, collection methods
- Consumer decision-making models: Routine, limited, extensive, and impulsive buying
- Data Analytics in marketing: How businesses use data for market segmentation and targeting
- Social media listening & sentiment analysis

• **AI, Automation, and Personalization in Marketing**

- Artificial Intelligence (AI) in marketing: Data-driven decision-making
- Marketing automation tools: Chatbots, AI-driven content creation, automated ad campaigns
- Personalization strategies: AI-driven recommendations and real-time user experiences
- Case studies: AI implementation in Amazon & Google

• **Emerging Technologies in Marketing**

- Virtual Reality (VR), Augmented Reality (AR), and Mixed Reality (MR)
- Applications in industries: Retail, Healthcare, Fashion, and Entertainment
- Blockchain technology: Enhancing transparency in advertising, influencer marketing verification, and smart contracts
- Future trends and ethical considerations

• **Agile Project Management in Marketing**

- Agile methodology vs. traditional project management
